YOU ARE INVITED TO ATTEND A FREE  
EDUCATIONAL SEMINAR...PLUS, EARN 3 PDH CREDITS!

McCall-Thomas Engineering's professional engineering staff will provide the key to understanding the basics of Electrical Arc Flash hazards. We will review the applicable Code (NEC, NFPA) requirements and OSHA explanations that affect you and your facility. Basic calculation methods will be reviewed and equipment Arc Flash labeling will be discussed.

Personal Protective Equipment (PPE) levels will be reviewed. McCall-Thomas Engineering has solutions to help alleviate problematic areas that might exist in your electrical system found during an Arc Flash evaluation. Come and learn the secrets of Arc Flash.

McCall-Thomas Engineering's energy expert partner, Industrial Technology Associates, will also be giving a highly informative presentation on the savings achieved through conducting an energy audit. Topics will highlight how an energy audit can reduce your energy consumption and costs, resolve billing issues and determine the best place to look for significant energy savings opportunities.

This free "Lunch and Learn" seminar is a must attend for all Facility Managers, Engineers, Maintenance Personnel, Plant Managers, Health and Safety Officials, Production and Operation Managers and anyone involved with electrical power systems.
